-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 June 2005.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-16 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-16 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.

- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

CHRISTOPHER P. SCHWARTZ
PRIMARY EXAMINER

DETAILED ACTION

1. Applicant's response filed 6/8/05 has been received and considered. Claims 1-16 are pending in the application.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-16 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The added limitation to claim 1 of "for always positioning said vehicle chassis at a single specified distance from said unsprung portion..." was not found in the disclosure as originally filed.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-3 remain rejected under 35 U.S.C. 103(a) as being unpatentable over De Molina '239 in view of Buma et al. '554.

Regarding claim 1, subject to the 112 rejection above, De Molina '239 discloses a suspension damping system as clearly seen in figures 1 and 3 but lacks a specific discussion of a distance determining means between the unsprung portion and vehicle chassis.

The reference to Buma et al. is relied upon to teach such systems are notoriously well known in the art. Please see col. 4 last paragraph and elements 80-86.

One having ordinary skill in the art at the time of the invention would have found it obvious to have modified the device of De Molina et al. with a height or distance sensor as taught by Buma to add an additional element of ride control to the vehicle. Such may be the case when the vehicle is expected to carry additional loads or to be used for towing applications.

Regarding claims 2,3,9 as can easily be seen in figures 1 and 3 of De Molina these requirements are met. Note the valve assembly at 110.

6. Claims 4-16 rejected under 35 U.S.C. 103(a) as being unpatentable over De Molina in view of Buma as applied to claim 3 above, and further in view of either Heinz et al. or Patzenhauer et al. '885.

Regarding claim 4 De Molina, as modified above, lacks specifically showing the valve assembly 110 having open and closed positions through the interaction of elements 136 and 160, as discussed in col. 6.

However it would have been obvious to have either modified the valve accordingly such that the valve exhibited such characteristics at 136, 160 or to have modified the internals of the valve, as suggested by either Heinz or Patzenhauer such

that the valve could be opened and closed upon specific pressure changes imparted thereto to regulate fluid flow between the chambers. Such an obvious modification would simply depend upon the ride characteristics desired from the shock absorber/suspension system.

The limitations of claims 5-8,10-16 are considered to be met in view of the modification and/or the combined teachings of the references above. Note the close similarity in the structure of the valves between applicant's and that of the pressure adjusting valve of Heinz. The valves of Heinz or Patzenhauer could be used as substitutes for that of de Molina.

Response to Arguments

7. Applicant's arguments filed 6/8/05 have been fully considered but they are not persuasive. From a reading of applicant's specification at pages 1-3 applicant's discuss that the application is directed to a self adjusting suspension system that can maintain the vehicles attitude or level for multiple loading conditions.

This is virtually the same object as that of de Molina (see the abstract). The reference to Buma et al. is relied upon to teach a similar self adjusting leveling system but one that uses height sensors to control it. Note the discussion of the height detection means in col. 2 and the predetermined standard and target heights in cols 5 and columns 10-12. The vehicle height is controlled in such a way to attain these heights.

Applicant's added limitations to claim 1 of positioning the vehicle chassis at a single specified difference is simply an alternative equivalent means of controlling the vehicle height to that taught by de Molina as modified by Buma.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher P. Schwartz whose telephone number is 703-308-0576. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Bucci can be reached on 703-308-3668. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
